## 【Specification】

Model	AC-100L	AC-100GRL	AC-200L	AC-200GRL	AC-300L	AC-300GRL
Channel	1 0 0ch (Secondarily sort setting is option)		2 0 0ch (Secondarily sort setting is option)		3 0 0ch (Secondarily sort setting is option)	
Main power	200V 10A	200V 12A	200V 20A	200V 25A	200V 25A	200V 30A
Dimensions	(W) 852mm x (D) 1000mm x (H) 1770mm		(W) 1490mm x (D) 1000mm x (H) 1770mm		(W) 2140mm x (D) 1000mm x (H) 1770mm	
Weight	380kg.	400kg.	650kg.	680kg.	1000kg	1050kg
Maximum throughput	8t/h		16t/h		24t/h	
Compressor capacity	2. 2kw ~ 7. 5kw		5. 5kw ~ 15kw		7. 5kw ~ 22kw	
Dust cleaner capacity	0. 4kw ~ 0. 75kw		0. 75kw ~ 1. 5kw		1. 5kw ~ 3. 7kw	
Main use	White rice, Wheat, Buckwheat, Sesame etc.					

- ※ Air compressor, air drier and dust cleaner are optional parts.
- ※ Air compressor capacity and dust cleaner capacity will change depends on materials.
- ※ Process capacity changes with the condition of materials and sorting.
- ※ Improvement may be made and specifications may change without notice.

Quality Control Sorting Machine

**Active Color**

Quality Control Sorting Machine with foreign substance reject function loading

**Active Color-GR**

MODEL AC-200L

# Compilation of Active Group with wealth of skills

active  
GROUP

## Point 1

### Product accuracy and yield increased

New type chute / New type ejector / New type sensor

## Point 2

### Many functions loading

Gradually start function / Auto wave adjustment / Feeder sensor / Auto-reject function / AIS function / Magnet for metal removal / 10 mode memory function

## Point 3

### Environmentally Conscious Design

LED display  
Stainless steel construction (parts contact with grain)

#### New type chute

The length of rice is 5mm on an average, therefore sometimes rice flew sideways at 9mm chute. Now **new model 4.5mm chute**, rice flows only lengthways. It aligns each grain and flows faster more than before.

Previous type

New type

#### Contact Image Sensor

##### 【Structure of Sorting Machine】

The CMOS camera technology accumulated with the digital camera was applied, and low electric power and high speed improvement were realized.

Super compact size **CIS(Contact Image Sensor)** loading!

It contributes to the monitor performance, saving space and multichannel.

By the good-light design by original technology, the grain surface is uniformly illuminated on real time.

The difference between our new sensor and CCD line sensor is read the information as Animation processing and processed the digital signal by high speed, however CCD camera is read as photograph which is high-speed top sending. Therefore our new sensor can correspond flow widely which doesn't have to set the flow by sensor.

Color grain sorting will sort out the small black spot without overlooking. Also at chalky sorting, Preeminent sorting capability and performance can be demonstrated without dropping the amount of flow. It is possible to correspond the sorting material which mixing rate is about 50% at throughput

#### 【Memory function】

It became possible to memorize from the 5 modes to the **10 modes**.

#### 【AIS function】

##### AIS(Auto Individual Sensitivity) function

The sensor has been set up at every channel to sort surely. Our new model sensor can improve sorting accuracy more certainly.

Automatic one-touch adjustment performs optimal environmental setup. It can be performed easily also at operators.

Before sorting, if setup of counting rate is inputted it performed automatic sensitivity setup and automatic sensitivity collection during operation.

#### 【Ejector self-check function】

Ejector **self-check** became possible to operate exactly and total ejector counting function is also loading.

Ejector self-check function loading.

#### Energy saving LED display

- ▶ Stable at low temperatures
- ▶ Semipermanent  
Reduced running costs
- ▶ Environmentally friendly

Multi color LED display makes it possible to sort a wider range of grains

##### Light Emitting Diode

Bright

#### Sorting Sample

##### Sorting of White rice

Accepted

Rejected

Chalky

Accepted

Rejected

##### Sorting of Sesame

Accepted

Rejected

##### Foreign Substance

Glasses, stones etc.
