

Line Automatic System QCM-200

Future is here!!

QCM-200

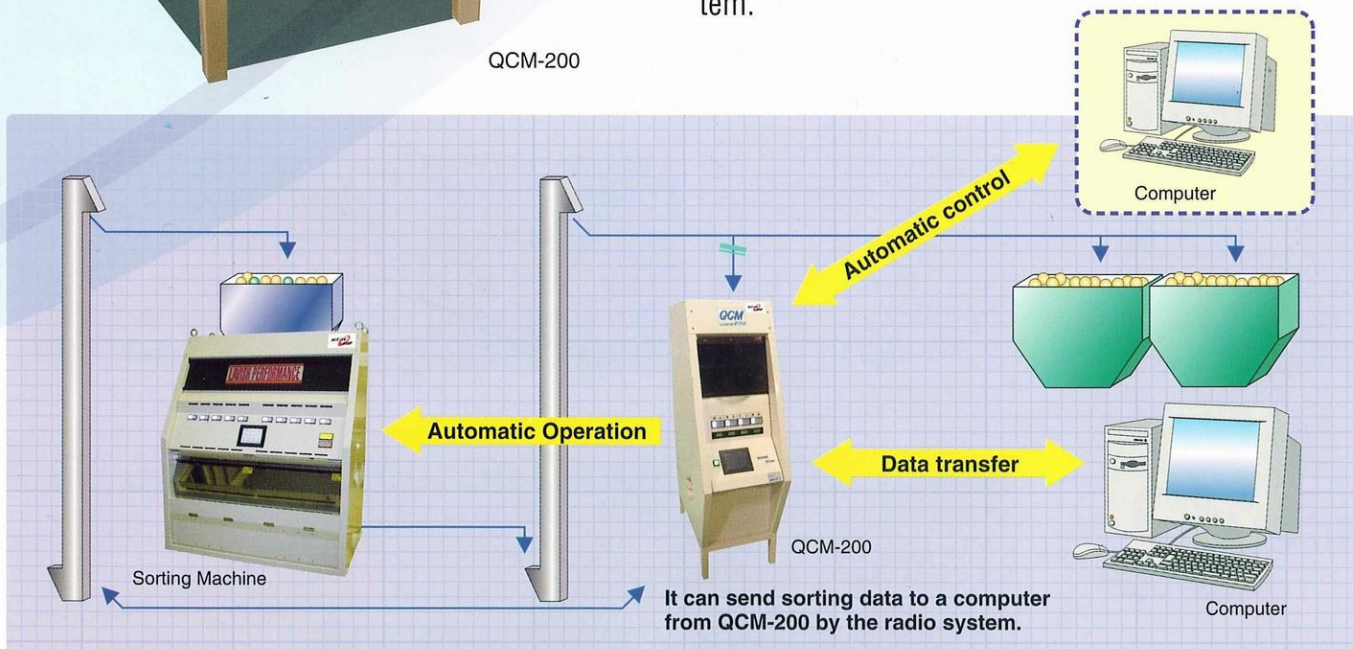

Succeed to provide the trustworthy and safety by data management.

Characteristics

- Product accuracy is checked constantly.
- Fine self-judgment adjustment function.
- Controlling of sensitivity and flows of sorting machine at automatic operation by loading the remote communications system.
- A product check is expressed by number, and it can accumulate as a data. Now a operator's check is not required any longer.
- Compact size with an easy setup.
- Data can be easily downloaded to a computer.

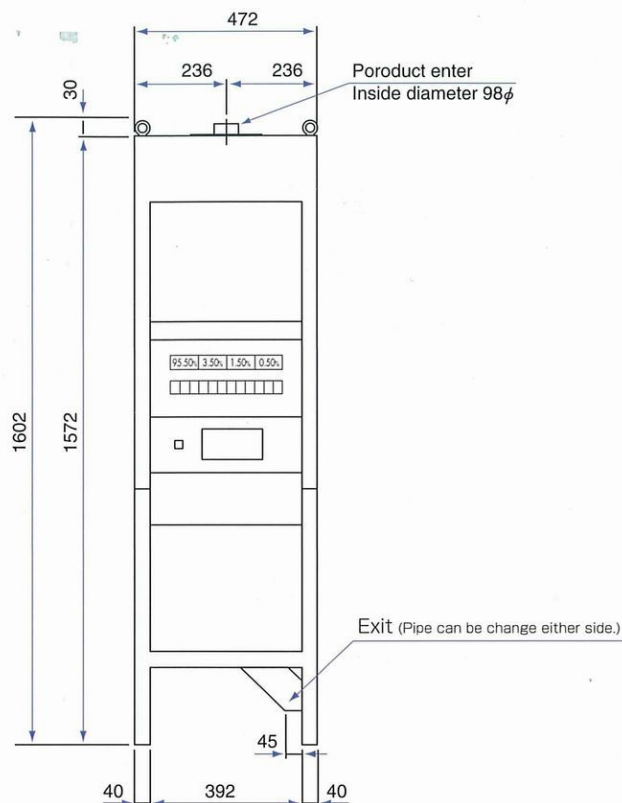

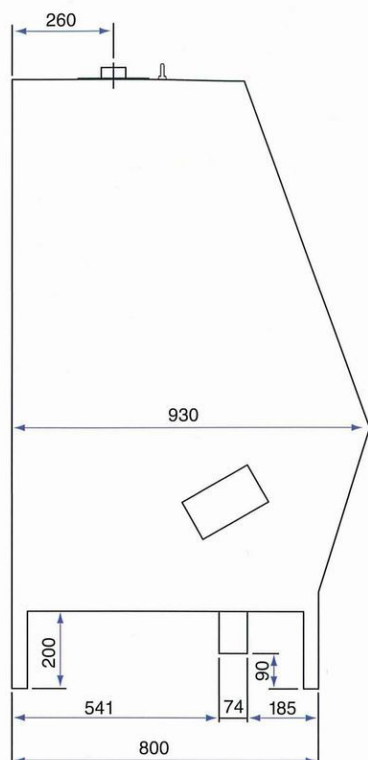

Remote communication system loading!!

- Option : A sorting situation can check immediately at our company by the remote communication system.

Total number of Foreign Substance	0	0	0	0	0	0	0	0	0
Total number of Material	5172	5165	5165	5166	5192	5161	5177	5186	5183
Sensitivity setting	304	304	304	304	304	302	302	302	302
Flowing Setting	60	60	60	60	60	60	60	60	60

Specification

Model	QCM-200	Power consumption	0.3kw
Sorting Materials	White rice • Blown rice • Wheat	Required amount of air	4.0L/min
Recording Type	CSV File	Optional Parts	Computer
Weight	150kg		Air cylinder
Size	L800×W472×H1572	Circumference Environment	Circumference temperature 10~40℃
Main power	AC100V 3A		Circumference humidity less than80%
